## Office Address:

329 West College St  
Ladoga, Indiana 47954  
Ph: (888) 355-7604  
Direct: (765) 942-5019  
www.energy-nad.com

Branch Offices  
Parker, AZ ..... Norman, OK

## Business Overview

Duns: 079238901  
Cage: 71VE6  
EIN #: 46-2305521  
UEI: JEAMNJKK7LG4  
Type: ISBEE, IEE, SBA  
Native American Owned & Operated

## Contact Information

Mr. Steve Weir  
Vice President  
Cell: (865) 740-5859  
Email: steve@energy-nad.com

## Base Bonding Capacity

1MM Per Project 5MM aggregate.  
SBA Bonding Match

# CAPABILITY STATEMENT

Regardless of the type of energy supplied or the type of market served, all Utilities and Public Agencies are driven to reduce costs and raise productivity. ENAD's full range of products and services, industry experience, and leading-edge technologies combine to help you deliver lowest-cost energy and highest value service to your customers.

## Company Overview

ENAD offers engineering, procurement and construction options to meet energy mandates, with a focus on renewable generation, distribution and optimization. As one of the primary BIA customers ENAD has been servicing the Colorado River Agency, Electrical Services (CRAES) for several years. Since 2013 ENAD has repaired, constructed, and maintained High voltage power lines, substations, transformers and generating facilities for Federal Agencies and tribal governments and Utility industry.

## Mission, Vision, & Core Values

### VISION:

To establish Energy by Native American Design (ENAD) as the premiere contractor for Federal agencies, Tribal governments and utility industries while maintaining our heritage and principles.

### MISSION:

Provide comprehensive technical solutions for energy related problems with improvements through technological, vocational, and utility programs servicing Federal agencies, Tribal governments and utility industries.

### CORE VALUES

**Integrity | Commitment | Quality | Performance | Service**

**Power through  
Self Determination  
and Strength**

Building Construction  
423730 ... Warm Air Heating and Air  
Conditioning Equipment and Supplies  
Merchant Wholesalers  
238210 ... Electrical Contractors and Other  
Wiring Installation Contractors  
333611 ... Turbine and Turbine Generator  
Set Units Manufacturing  
335311 ... Power, Distribution, and  
Specialty Transformer Manufacturing  
335312 ... Motor and Generator  
Manufacturing  
541330 ... Engineering Services

## Core Solutions:

- Energy Procurement
- Energy Intelligence
- Solar & Renewable Energy Solutions
- Energy Efficiency & Optimization
- Backup Generation & Batteries
- HVAC Refurbishment
- Design Build Contracts
- Electrical Engineering & Design
- Facility Planning, Operations & Maintenance
- Mechanical Engineering
- Supply Chain Management
- Microgrid Design & Implementation

ENAD's full range of products and services, industry experience, and leading edge technologies combine to help deliver lower-cost energy and highest value service to your customers

## Past Performance

Rated Excellent in Contractor Performance Assessment Reporting System (CPAR) ...

- U.S. Air Force
- Department of Energy
- U.S. Navy
- Department of Interior

ENAD has provided service to the BIA for many years. One of the primary BIA customers ENAD has been servicing is the Colorado River Agency, Electrical Services. ENAD has repaired, constructed, and maintained the High Voltage Power Lines, Substations, Transformers, and Generating Facilities

## Solutions Review

### Energy Procurement

Our procurement capabilities are supplier agnostic and enhanced by advanced analytics to drive and develop long-term strategies based upon quality, supplier diversity, supplier reputation, and price.

### Solar & Renewable Energy Solution

Commercial Solar solutions provide business owners with the opportunity to take control of their utility bills, increase property value and demonstrate their commitment to the environment.

### Backup Generation & Batteries

Power outages can take a serious toll on your production and profitability. Harnessing the power of backup generation and battery is a vital safeguard.

### Generator Testing & Analysis

A load bank generator test puts a generator under varying load conditions and sees how the machine reacts to the power draw. Load banks offer the most accurate means of testing the power equipment.

### Microgrid Design & Implementation

Gain complete independence by forming your own power grid to supply you as a host and surrounding communities.

### HVAC Refurbishment

With HVAC systems across the country coming offline, refurbishment can restore these systems to 90% of their original efficiency. The result is less energy usage and cleaner air quality at a quarter of the cost of replacement.
