# 2023

## ELECTRICAL GENERATION SOLUTIONS - HYDRO

Hydro-Electric Plants produced about 7.3% of total U.S. electricity generation and about 37% of electricity generation from renewable energy in 2020. Hydropower plants use flowing water to spin a turbine connected to a generator.

ENAD has a proven record of success assisting Hydro Electric Power plants. Regardless of the type of energy supplied or the type ENAD's full range of products and services, industry experience, and leading edge technologies combine to help deliver lower- cost energy and highest value service to our customers.
